Increasing global internet access
Tetra Tech provides practical, innovative, and sustainable infrastructure solutions around the world.

Internet Connectivity Capabilities

Tetra Tech provides customers with support to provide internet access to underserved communities worldwide:

- Develop and design projects to increase internet access and, when appropriate, use a cost-saving, build-once approach
- Reform information and communications technology policy
- Facilitate transactions between project developers, financiers, and governments
- Structure and implement successful public-private partnerships
- Provide financial advisory services including feasibility studies, due diligence, capital raising support, bidding, and tendering support
- Implement projects that integrate internet access to achieve development goals

Nearly 4 billion people—60 percent of the world—currently lack adequate internet access. Working with our clients, Tetra Tech is helping fill that gap.

Internet Connectivity Advisory Services

Tetra Tech delivers innovative solutions to public and private clients around the world to expand internet infrastructure, increase access to the internet for underserved markets, and maximize the potential economic and social benefits of improved information and communications technology.

Information and Communications Technology

As new technologies, business models, and market structures emerge, Tetra Tech supports clients to improve information and communications technology systems, cybersecurity, and commercial sustainability.

Policy and Regulatory Advocacy

Tetra Tech strengthens government institutions by supporting the development of the policy, legal, and regulatory framework that allows the efficient delivery of internet services to both businesses and citizens.

Transactional Support and Due Diligence

Tetra Tech provides pivotal transaction advisory services. We serve as advisors to governments and investors in the full transaction life cycle.

Institutional Capacity Building

Tetra Tech develops and delivers key information and communications technology sector training to governments, businesses, and civil society organizations worldwide.

Public-Private Partnerships (PPP) and Training

Tetra Tech works with governments, corporations, multilateral institutions, and financial entities to help clients build institutional capacity and carry out successful PPP projects in the global infrastructure market.

Land Tenure and Property Rights

To secure right of way, implement shared infrastructure projects, and access land for internet infrastructure, Tetra Tech uses effective communications and outreach, institutional engagement, and land policy expertise.

Smart Cities, Energy, Transport, and Buildings

Tetra Tech provides program management, architecture-engineering services, data and communications system design, capacity building, financial planning, PPP, and marketing to optimize city, energy, transport, and building projects using real-time information.
Tetra Tech’s innovative, sustainable solutions help our clients address their water, environment, infrastructure, resource management, energy, and international development challenges. We are proud to be home to leading technical experts in every sector and to use that expertise throughout the project life cycle. Our commitment to safety is ingrained in our culture and at the forefront of every project. We combine the resources of a global, multibillion dollar company with local, client-focused delivery. tetratech.com
