

International Development Services

Empowering local communities and improving
livelihoods through sustainable global development

complex world | CLEAR SOLUTIONS™

Practical, sustainable solutions for international development

Tetra Tech provides scientific, sustainable, and industry-leading solutions to tackle the world’s most complex challenges. With 400 offices worldwide, we offer a wide range of integrated, multidisciplinary international development services. Tetra Tech’s approach is based on sound science, stakeholder engagement, capacity building, innovative technologies, and best practices. Our goal on every project is to ensure measurable results, local ownership, and sustainable development long after our work is complete. Our expertise includes monitoring and evaluation tools, grants management systems, compliance systems, and public-private partnerships.

Tetra Tech creates practical, environmentally responsible solutions for federal agencies, governments, multilateral banks, and multilateral corporations. Our clients include:

- Asian Development Bank
- Australian Department of Foreign Affairs and Trade
- Commercial enterprises
- European Commission
- Inter-American Development Bank
- Millennium Challenge Corporation
- National governments
- U.K. Department for International Development
- U.S. Agency for International Development
- U.S. Department of Defense
- U.S. Department of State
- U.S. Environmental Protection Agency
- U.S. Trade and Development Agency
- World Bank Group

Climate Change Business Journal recognized Tetra Tech with a Project Merit award for our support of the U.S. Agency for International Development’s Indonesia Forestry and Climate Support (IFACS) program. Through the IFACS program, Tetra Tech developed a scalable framework to serve as a model to significantly reduce Indonesia’s greenhouse gas emissions through conservation of carbon-rich forests and peatlands. Learn more at tetratech.com/IFACS.

Global Presence

Projects: 275+

Countries: 100+

Employees: 5,500+

Areas where we are currently working are highlighted in green.

Our Services

Agriculture and Economic Growth: Providing sustainable, inclusive solutions for agricultural development and rural livelihoods for the global community

Anti-Corruption, Accountability, and Transparency: Working with government, civil society, and private sector stakeholders to improve accountability, realign incentives to enhance integrity, simplify administrative procedures, reduce bureaucratic discretion, and shift societal attitudes for a sustainable reduction in corruption

Architecture, Engineering, and Infrastructure: Harnessing international expertise in engineering and architecture to deliver sustainable designs that address infrastructure challenges in developing countries

Clean and Renewable Energy: Improving the energy sector's performance, both in terms of enterprises and regulations, and helping to integrate renewable and other low-carbon-generation options into the energy mix

Democracy, Governance, and Rule of Law: Helping developing and transitioning countries establish systems and institutions for democratic, accountable governance that are essential for equitable economic growth, social development, protection of human rights, and security

Environment and Natural Resources: Gathering stakeholders to develop, implement, and evaluate policies and practices that improve natural resource management and create resilient communities

Health and Education: Enhancing the effectiveness of health and education systems to improve the quality of life, empower communities, and create lasting social and economic change

Land Tenure and Property Rights: Using effective communications and outreach, institutional capacity building, demand-driven technology, and legal reform to improve land policy and access

Public-Private Partnerships and Training: Working with governments, corporations, multilateral institutions, and financial entities to help clients build institutional capacity and carry out successful P3 projects in the global infrastructure market

Research, Monitoring, and Evaluation: Improving performance of government agencies, organizations, and project teams using innovative evaluation tools to understand program effectiveness

Security, Stabilization, and Countering Violent Extremism: Helping close socio-economic and political gaps that permit or facilitate the growth of terrorist and violent extremist ideology and behavior, while promoting community and state resiliency through institutional strengthening and capacity building

Water Resources and Sanitation: Instituting best practices for providing clean water, safe sanitation, and effective hygiene management through strengthening service providers, improving public health and municipal service delivery, and promoting resilient water resources management
