

Emergency
Management
and Community
Resilience Services

Comprehensive services from preparedness through recovery

complex world | CLEAR SOLUTIONS™

Tetra Tech is a leading provider of emergency management and community resilience services across the entire continuum of devastating impacts of man-made and natural events. We help public and private sector clients address preparedness, mitigation, response, and short- and long-term recovery needs.

During steady-state conditions, our disaster preparedness strategies include developing and applying technology to better inform clients about the wide array of hazards they face; prioritizing, scoping, and implementing projects designed to mitigate risks; and planning, training, and exercising public safety professionals to enhance their readiness to respond. Post-disaster, Tetra Tech offers a wide range of incident management support including augmenting staff and personnel; facilitating and monitoring rapid infrastructure repair and debris management; and advising and guiding clients through comprehensive financial management, community resilience, and economic redevelopment phases of disaster recovery.

Tetra Tech has successfully responded to more than 2,000 natural, man-made, and technological events, allowing our emergency management practitioners and responders to infuse real-world experience into our plans, trainings, and exercises.

Our Capabilities

Preparedness

- Disaster-specific response planning
- Functional needs assessment and evacuation and shelter planning
- Flood warning and emergency evacuation planning (FWEEP)
- Emergency management training for public safety and public disciplines
- Emergency operations drills and table-top and full-scale exercises
- Secure the Cities Program technical support and radiological expertise

Mitigation

- Hazard mitigation planning
- Loss avoidance studies
- FEMA Community Rating System consulting
- Floodplain management studies and analyses
- Levee and dam inspection and management
- Climate adaptation planning
- Comprehensive and master community planning
- Land use and zoning policy and plan development

Response

- Disaster operations staff augmentation
- Debris management and monitoring
- Environmental and spill response
- Time-critical infrastructure assessment and repair
- Incident action planning and command system report

Recovery

- Infrastructure and residential damage assessment
- FEMA Public Assistance grant administration and consulting
- HMGP application and program administration
- HUD CDBG-DR consulting
- Economic recovery planning
- Community resilience planning
- Water and wastewater, flood control, and green infrastructure design and construction

Supporting state and local, federal, commercial, and international clients

State and local: We provide more support in this market sector than any other firm. We have completed more than 750 projects directly for state and local clients in all 50 states, including work for transit agencies, port authorities, and educational institutions.

Federal: We support the security, preparedness, mitigation, response, and recovery missions of a wide spectrum of federal agencies including NOAA, FEMA, and U.S. DHS, CBP, USCG, and EPA.

Commercial: Tetra Tech supports commercial clients in the transportation, oil and gas, utilities, health systems, and manufacturing sectors with security, preparedness, response, and recovery needs.

International: We strengthen coastal communities' infrastructure and economic resilience and institutional capacity to prepare for, respond to, and recover from events and address climate change impacts.

Specialty Services

Climate Change Adaptation

Tetra Tech has nearly 50 years of expertise in climate change adaptation and mitigation strategies. We are recognized leaders in the rigorous analysis and modeling required to create effective solutions that address vulnerability, adaption, mitigation, and management.

Community Relations and Crisis Communications

Tetra Tech's in-house experts provide and implement all components of strategic communications plans throughout all stages of emergency management. Our expertise includes multimedia, social media (Facebook, Twitter, LinkedIn), advertising, and public and media relations experience to address a community's crisis communications needs.

Comprehensive Recovery Planning

Tetra Tech helps local, state, federal, and regional clients reduce their vulnerability to hazards with pre- and post-disaster planning services. Our team prepares Disaster Management Act of 2000 all-hazard mitigation plans and community reconstruction plans; conducts HAZUS-MH analysis, grant administration, and benefit-cost analysis;

provides Community Rating System support and Housing and Urban Development Community Development Block Grant-Disaster Recovery (CDBG-DR) support; integrates mitigation planning into community activities; identifies project funding; and implements mitigation and recovery projects.

Community and Economic Development Planning Services

Our planners assist clients with all aspects of planning to create focused strategic plans that include input from key stakeholders, current data and statistics, identified and prioritized projects, detailed steps for implementation, consideration of land use controls and codes, opportunities for incremental success, and definable and measureable goals.

Public Funding Strategies

Tetra Tech assists with developing a comprehensive public funding strategy, identifying the available sources of public funding for a project, and developing a customized funding strategy to leverage and maximize each source. Our team assists with preparing the required applications, documentation, and supporting material to favorably position a project for public funding.
