

Planning Services

Comprehensive lifecycle planning solutions

Creating targeted, resilient, smart growth strategic plans

Tetra Tech helps clients make informed decisions that support their unique short-, mid-, and long-range planning goals. Using our in-depth experience and comprehensive vision, we assist communities, developers, and military installations in creating and executing plans that are tailored to their specific needs, satisfy complex regulations, and include stakeholder input and public consensus. Tetra Tech's multidisciplinary team includes numerous accredited, charrette-certified, and award-winning planners who are versed in UFC-compliant planning. We leverage the vast knowledge of our top experts in policy, engineering, science, technology, mapping, and project management to enhance our planners' solutions and the success of our clients' projects.

At Tetra Tech,
we approach
our work with
passion, creativity,
and innovation.
We offer smart
solutions to the
most complex
planning
challenges.

Client-focused, Integrated Approach

Our planners are advocates for our clients, focused on delivering projects that align with our clients' vision—on time and within budget. Tetra Tech's teams are empowered to address unique challenges and specialized requirements that arise on public and private projects.

We assist clients with all aspects of planning to create focused, strategic plans that include input from stakeholders, analysis of data and statistics, economic impact analysis, project identification and prioritization, detailed implementation steps, consideration of land use controls and codes, opportunities for incremental success, and definable and measurable goals to achieve the plan vision.

As a leading global provider of consulting, engineering, and technical services, Tetra Tech offers local presence combined with depth of resources.

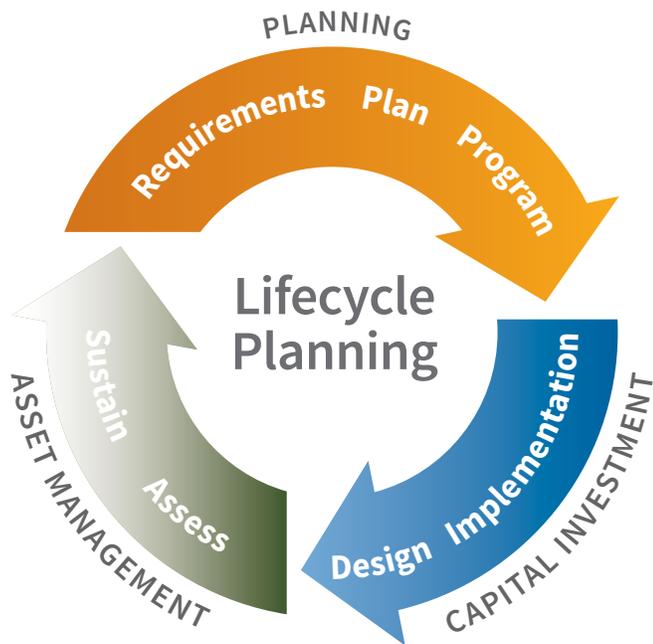

Multi-sector Planning Expertise

Commercial: We leverage relationships and use state-of-the-art tools to help commercial clients achieve their business goals for development, infill, and reuse.

Public Sector: Our planners apply vast, interdisciplinary resources to partner with communities and state and local clients to develop comprehensive plans that are compelling, understandable, and reflect community goals for smart growth and resilience.

Federal and Military: We provide integrated, comprehensive military base and facility planning services that incorporate current and future budgets, optimization, and mission needs.

International Development: Tetra Tech offers global reach, resources, and experience combined with local understanding for sustainable planning approaches to growth and development.

Lifecycle Planning Services

Tetra Tech recognizes that planning today requires understanding of facility and infrastructure conditions, energy management, local and federal requirements, and community partnerships, as well as the data that contributes to an enterprise planning effort. We offer expertise in planning, real property, energy, environmental, utilities, and data integration to help our clients achieve a long-term, sustainable plan.

Tetra Tech's planning services protect and improve quality of life through responsible resource management and sustainable development and infrastructure. We continuously adapt to our clients' changing needs and solve their most challenging issues by integrating technical, regulatory, and operational requirements with sound engineering, science, and planning principles.

Offering broad perspectives, innovation, and excellence in planning services

Specialized Planning Services
