

One Water Services

Comprehensive water solutions for drinking water,
wastewater, wet weather, stormwater, and reuse

complex world | CLEAR SOLUTIONS™

Clean, safe water is essential to life

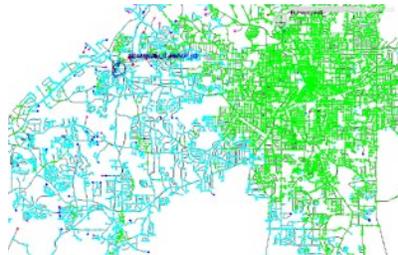

Tetra Tech helps provide access to safe, abundant water supplies; effective treatment of stormwater and wastewater; flood control and restoration tools; and innovative watershed protection approaches to assess, protect, and restore our water bodies. Our potable water services help protect public health and improve quality of life. Tetra Tech is involved in all phases of the water cycle, combining state-of-the-art techniques and demonstrated best practices.

Projects

**96 MGD Howard F. Curren
Wastewater Treatment Plant
Process Optimization**
City of Tampa, Florida

50-year Water System Master Plan
City of Atlanta, Georgia

**30 MGD Brackish Groundwater
Desalination Plant**
San Antonio Water System, Texas

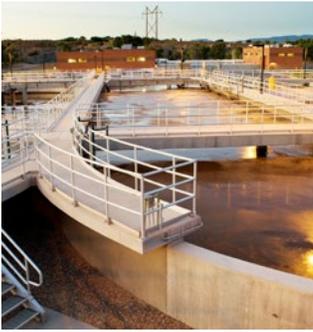

**Green Infrastructure
Implementation Program**
*Detroit Water and Sewerage
Department, Michigan*

**Carlsbad Seawater Desalination
Program 54-inch Finished Water
Pipeline**
*San Diego County Water Authority,
California*

**3 MGD Groundwater
Replenishment and Potable
Reuse Program**
City of Clearwater, Florida

One Water Solutions

Tetra Tech assists municipalities and government agencies to identify and evaluate water supply sources for multiple uses, including drinking water, irrigation, commercial, industrial, institutional food production, and energy production. As industry leaders in potable and nonpotable reuse, desalination, utility resiliency, and green infrastructure, Tetra Tech guides and supports efficient, effective total water management for communities.

Operational Technology Solutions

Tetra Tech provides master planning, asset management, and SCADA solutions to assist government agencies and commercial and industrial manufacturers. Tetra Tech is a leading provider of intelligent water enhancements—including real-time control, emergency preparedness, infrastructure security, smart grids, and data analytics—that address reliability, safety, and system optimization.

Services

Intelligent Planning and Studies

We prepare innovative master plans that result in a living document. By using intelligent planning methods, we can perform scenario analyses that inform smart capital improvement program investment. Tetra Tech also conducts water supply studies, treatment feasibility studies, and pilot- and bench-scale treatment studies to support implementation of first-of-their-kind projects.

Adaptive Program Management

Tetra Tech partners with our clients through all stages of their programs, ensuring right-sized integration at all levels. Our proven systems, processes, tools, and skills enable us to provide real-time information to our clients, including identification and tracking of the client's key performance metrics.

Energy and Process Optimization

Tetra Tech's experts work with clients to evaluate, troubleshoot, and optimize each plant's performance. Thorough process optimization for wastewater and reclaimed water treatment plants can save significant money in energy and chemical costs.

Design

Tetra Tech provides in-house, multidisciplinary design services from conceptual to design to construction document preparation for bidding. Tetra Tech's designers use 3D modeling throughout the project implementation to enhance project reviews, discipline coordination, quality control, and visualization.

Alternative Project Delivery

Our teams are experienced in delivery methods that meet the custom needs of our clients, including public-private partnerships (P3), design-build, and construction management. We have experience as the owner's agent, design-build engineer, and construction manager.

Training and Education

Through the Tetra Tech Learning Institute, we offer a range of learning programs, including extended in-person courses, self-directed online training development, webinars, and interactive e-learning sessions. Our most popular courses include activated sludge process control, biological nutrient removal, and desalination process troubleshooting and optimization.

TETRA TECH

Tetra Tech's innovative, technology-enabled solutions help our clients address their water, environment, sustainable infrastructure, renewable energy, and international development challenges. We are proud to be home to leading technical experts in every sector and to use that expertise throughout the project life cycle. Our commitment to safety is ingrained in our culture and at the forefront of every project. We combine the resources of a global, multibillion dollar company with local, client-focused delivery.
