

COVID-19 CONTACT TRACING SERVICES

Tetra Tech's well-qualified team of trained professionals is fully prepared to augment your contact tracing team. Our team will work at the direction of your senior epidemiologists to implement contact tracing as well as daily monitoring within the policies and protocols currently being implemented by your agency.

OUR TEAM'S QUALIFICATIONS:

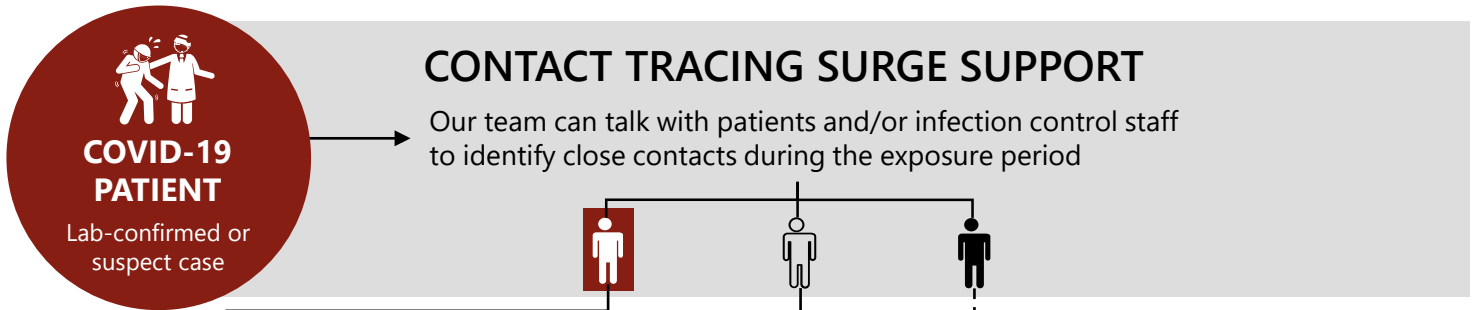

- Highly experienced professional staff (epidemiologists, MPH, MS, BS)
- Trained and certified in patient confidentiality (e.g., HIPAA)
- Cultural awareness and sensitivity during the interview process

INTEGRATION AND EFFECTIVENESS:

- Operate within your public health agency's plans, protocols, and reporting systems
- Available to receive just-in-time training with your agency's senior epidemiologist

SURGE SUPPORT:

- Our team can augment your contact tracing capacities using your hardware, software, and disease reporting systems

CONFIRMED/SUSPECT CASES

Prevention Guidelines:

Provide your public health agency's guidance on case isolation, testing, data entry into NBS, etc.

Check for symptom onset throughout the 14-day monitoring period

Repeat cycle until incidence rate declines

EXPOSED CONTACTS

Support Contact Interviews and Enrollment into the CDC's Text Illness Monitoring (TIM) System:

- Conduct daily checks of contacts throughout 14-day monitoring period
- Provide guidance on isolation, testing, and when to seek medical care for contacts who develop COVID-19 symptoms

LOSS TO FOLLOW-UP

Expand Capacity:
Help locate non-respondent or missing contacts, providing detailed records to your senior epidemiology staff

FUNDING SOURCES: • CARES Act • Stafford Act

Tetra Tech's team supports your contact tracing team to help mitigate further community transmission of SARS-CoV-2 by:

- Responding to your agency's needs
- Respecting your agency's policies and protocols
- Reducing the burden of disease by SARS-CoV-2/COVID-19
