OASIS — One Acquisition Solution for Integrated Services

Pool 1 GS00Q140ADU138 • Pool 3 GS00Q140ADU337 • Pool 4 GS00Q140ADU436
What is the contract scope and how is work awarded?

OASIS spans multiple and integrated professional service core disciplines: program management, management consulting, logistics, engineering, scientific, and financial services, and ancillary services and products. Work is awarded under seven North American Industry Classification System (NAICS) pools. Tetra Tech was awarded three contracts in OASIS NAICS Pools 1, 3, and 4:

**Tetra Tech’s OASIS NAICS Pools**

**Pool 1 – Engineering, Environmental, and Management Consulting:** NAICS: 541330, 541360, 541370, 541380, 541611–541614, 541618, 541620, 541690, 541810, 541820, 541830, 541840, 541850, 541860, 541870, 541890, 541910, 541990. Tetra Tech provides a full range of engineering, environmental, and management services from offices in almost every state in the US and multiple OCONUS locations.

**Pool 3 – Engineering for Military/Aerospace Equipment/Military Weapons:** NAICS: 541330. Tetra Tech provides engineering support for military applications, acquisition, and deployment of aerospace equipment and military weapon systems, both from our offices and from personnel embedded at DoD, DOE, FAA, and other federal customer sites.

**Pool 4 – Research and Development (R&D):** NAICS: 541711, 541712. Tetra Tech’s internal R&D department supports the R&D activities of government customers from our offices and customer sites.

Who can use this contract?

All U.S. government agencies domestic and OCONUS.

What are the benefits of using OASIS?

OASIS supports commercial and non-commercial requirements, which means any contract type may be used for any U.S. government agency, domestic and international. OASIS task orders will be awarded quickly because of pre-approved contractor qualifications and a streamlined contracting process.

How can you access OASIS?

- **Direct Acquisition:** GSA issues a Delegation of Procurement Authority to the agency Ordering CO
- **Assisted Acquisition:** GSA performs the acquisition on behalf of the agency
Program Management Services—Tetra Tech’s program and project management services are structured with a single purpose in mind: maintain satisfied clients. We provide a complete assortment of services and expertise, resulting in the safe, compliant, cost-effective, and efficient execution of projects of any size. Tetra Tech’s proven systems, processes, and tools provide real-time information from project inception through closeout.

- Acquisition support
- Business intelligence support
- Capabilities integration
- Cost, schedule, and performance
- Cost estimation and analysis, manpower estimating
- Cost and performance trade-off
- Decision analysis
- Earned value management analysis
- e-business support
- Information analytics
- Interface management
- Knowledge based acquisition
- Planning, programming, and budgeting
- Program management
- Program documentation
- Project management
- Regulatory compliance
- Requirements management
- Risk assessment and mitigation
- Risk management
- Stakeholder requirements analysis
- Technical assessment and planning
- Vulnerability assessment

Management Consulting Services—Tetra Tech’s management approach is based on stakeholder engagement, capacity building, innovative technologies, and best practices—including knowledge management, strategic planning, and training—to ensure sustainable development long after a project is complete.

- Business process re-engineering
- Business case development
- Change management
- Concept development and requirements analysis
- Performance improvement
- Information analytics
- Knowledge management
- Long range strategic planning and forecasting
- Coordination with law and policymaking entities
- Strategy development
- Social media consulting
- Tactical and readiness planning
- Technical advisory services
- Training and facilitation

Engineering Services—Tetra Tech provides engineering and architecture design services, including green design and sustainability services, for projects related to aviation systems engineering, water infrastructure, transportation, and buildings and facilities.

- Alternative energy engineering
- Architectural design
- Communications engineering
- Concept development
- Configuration management
- Data analytics and management
- Design documentation
- Energy services
- Engineering and process improvement
- Environmental consulting and remediation
- Environmental management
- Human factors
- Integration and interoperability
- Life cycle management
- Mission assurance
- Modeling and simulation
- Natural resources management
- Operations and maintenance (O&M)
- Quality assurance
- Risk management
- Software development
- Systems engineering and training
- System safety engineering
- System security
- System verification and validation
- Test and evaluation
Tetra Tech is a leading provider of consulting, engineering, program management, construction management, and technical services. The Company supports government and commercial clients by providing innovative solutions to complex problems focused on water, environment, energy, infrastructure, and natural resources. With 14,000 employees worldwide, Tetra Tech’s capabilities span the entire project life cycle.

**Scientific Services**—Tetra Tech applies comprehensive scientific knowledge in planning, conducting, evaluating, and managing applied research, knowledge enhancement, and/or technology development and innovation.

- Engineering sciences
- Physical and life sciences
- Mathematical sciences
- Environmental sciences
- Psychological sciences
- Social sciences

**Logistics Services**—Tetra Tech manages the flow of resources and goods between the point of origin and the point of destination to meet the requirements of organizations and projects.

- Deployment logistics
- Disaster management
- Distribution, transportation, and logistics
- Integrated logistics support (ILS)
- ILS risk assessments
- Inventory management
- Logistical studies and design
- Logistics management
- Logistics O&M
- Logistics optimization
- Logistics training
- Accounting and auditing
- Affordability analysis
- Analysis of cost alternatives
- Budget analysis and tracking
- Business information
- Cost estimating and analysis
- Cost performance risk assessments
- Disbursement and reconciliation
- Economic analysis
- Financial risk analysis
- Fraud detection
- Grant management
- Impact statement development
- Life cycle cost
- Return on investment analysis
- Repair and alteration
- Security
- Supply chain management
- Value chain management
- Test range support
- Life cycle sustainment

**Financial Management Services**—Tetra Tech brings prominent experts in financial management and economic analysis for clean and regional energy market development, risk analysis, accounting and auditing, transactional support, and more.

- Engineering sciences
- Environmental sciences
- Physical and life sciences
- Mathematical sciences
- Psychological sciences
- Social sciences
- Accounting and auditing
