Hydropower Licensing/Relicensing Services

Owners and operators have an advocate on their side when they hire Tetra Tech for their licensing and relicensing services.
Licensing/Relicensing

Tetra Tech can resolve the most challenging and complex issues that may occur during the licensing or relicensing process. Tetra Tech provides broad-based licensing services to private and public utilities and IPP’s. We have provided major environmental support services on federal hydroelectric projects and worked directly for the FERC in support of its project licensing review, evaluation, and NEPA compliance efforts. Our services include:

- License and relicense applications
- Federal and state/provincial permitting
- Advocate to owners on regulatory issues
- Hydrologic and hydraulics assessment and modeling
- Water quality monitoring and modeling
- Aquatic habitat assessment and modeling
- Evaluating impacts to fish, wildlife and botanical resources
- Geologic and geotechnical investigations
- Stream restoration design
- Historical and cultural resources assessments
- Wetlands delineation
- Comprehensive climate change studies
- Geomorphology studies
- Aquatic invasive species assessment and management
- Environmental protection, mitigation, and enhancement measures
- Stakeholder consultation
- Decommissioning
