

Renewable Energy

Mission Statement

Grow Tetra Tech's global renewable energy program to be a global industry leader by expanding our client relationships, winning new large programs, and advancing the sustainable adoption of renewable energy worldwide.

Description

The Renewable Energy Global Strategic Initiative will focus on renewable energy generation clients and services to support solar, onshore and offshore wind, hydropower, and emerging generation technologies and storage development. We will focus on our key clients' global expansion, with primary growth anticipated in the United States, United Kingdom and Europe, and Australia, by combining local expertise with our global experience in specific types of projects. Tetra Tech has been top ranked for wind power by *Engineering News-Record* for more than a decade. This initiative builds on Tetra Tech's strong leadership and experience in front-end studies, permitting, and siting evaluations to support renewables for over a decade. We bring differentiated technology solutions to our clients, including software for assessing environmental conditions and mitigating climate-related risk.

Initiative Leadership

Erin Toelke will lead the Renewable Energy Global Strategic Initiative. She brings more than 25 years of experience to the role through direct experience managing renewable energy projects and developing client programs for many of the world's top renewable energy developers. Erin has been instrumental in advancing and growing Tetra Tech's renewable energy practice in the United States. She is building a global team who will collaborate and advance our growth strategy, including individuals representing our key renewable energy sectors and geographies.

Get Involved

If you want to get involved or are interested in more information reach out to Erin @[Erin.Toelke](https://www.linkedin.com/in/ErinToelke) on Teams or erin.toelke@tetratech.com.
